

1. As a customer, I want to be able to search for a product to see the details of a specific product.
2. As a customer, I want to be able to filter the product list, so I can see a group of products matching what I am looking for.
3. As a customer, I must be logged in to make a purchase, so my purchase history is visible under my credentials.
4. As a store owner, I should be able to add new products, so I can make additions to my product list to increase the profits.
5. As a store owner, I should be able to see the list of orders so I can organize and fulfill the orders I receive.
6. As a store manager, I should be able to remove a product, so the products that are not being sold anymore will not be visible to the customers.
7. As a store manager, I should be able to update the product inventory, so I can keep track of the inventory and see what we are running out of.
8. As a warehouse manager, I need to print an Order Pick List for each order in the warehouse, so I can have physical documents to review the orders.
